

The use of cell phones on an aircraft should NOT be allowed. The safety of every passenger would be affected. Most emergency preparations in the cabin are done with limited time for the possibility of an evacuation. The safety of everyone involved is teamwork. How can you accomplish this, with limited time if everyone is calling their loved ones? What about the person sitting next to you (and I mean next to you) who is trying to sleep while the boyfriend, on the cell phone is cursing and yelling at his girlfriend. I can see a lot of disputes at 35,000 feet. There are a lot of reasons, from one extreme to another, why cell phones should NOT be allowed on a small tube 35,000 feet in the air. I for one hope I will never see the day.
